## AGILE PROJECT MANAGEMENT FOUNDATION & PRACTITIONER

### Overview

This event, accredited by the APMG, and created in conjunction with the DSDM Consortium, provides the world's first independent certification in Agile Project Management. It provides delegates with an understanding of how the Agile Project Management process can enable planning, management and control of successful and well-controlled Agile projects. The course provides the opportunity to gain certification as an Agile Project Manager at both Foundation and Practitioner levels.

While approaches such as eXtreme Programming, Scrum and Lean Software Development are widely used for evolutionary change, this approach to Agile Project Management is based on DSDM Atern, the only established Agile approach encompassing a project concept and lifecycle. Organisations often need an Agile approach which recognises the need for a project discipline with a deadline for delivery, a clear target for business value realisation and a controlled budget. Agile Project Management presents a coherent and easily replicated approach to planning, resourcing and managing a successful and well-disciplined Agile project.

### Objectives

This event will enable delegates to:

- Understand the concepts, benefits and risks of Agile development
- Understand the philosophy, approach and principles of Agile project management, using DSDM Atern
- Understand the DSDM Atern lifecycle and products
- Set up appropriate project teams
- Plan and run a facilitated workshop
- Model and prototype aspects of the solution
- Elicit, analyse, prioritise and manage requirements
- Create a timeboxed plan for a project
- Understand the importance of negotiation and collaboration
- Use their skills to set up and manage an Agile project

### Target Audience

Those who are likely to be involved in the management of Agile projects and programmes, including:

- Project Managers
- Team Leaders
- Business Analysts
- Project Board and Project Steering Representatives
- Project Management Office Personnel
- Quality Assurance and Quality Control Managers

### Contents

#### Agile Project Management Fundamentals
